

Royal Van Zanten

# ALSTROEMERIA

2017-2018

# PROLOGUE

WE ARE PROUD TO PRESENT OUR NEW  
ALSTROEMERIA CATALOGUE 2017/2018.

These days, the ornamental sector has to face major challenges and we would like respond to these with reliable introductions. Colours have become brighter and flowers larger.

Especially for you as a grower, Royal van Zanten has also improved characteristic such as virus tolerance, stem quality, production, vase life and heat tolerance.

WE CONTINUE TO INVEST IN IMPROVEMENTS  
AND EXPECT TO BE ABLE TO FURTHER  
DEVELOP ALSTROEMERIA BASED ON A LONG  
TERM VISION.

In the catalogue we introduce nine new varieties. All these new introductions have been extensively tested in the Netherlands, Africa, Colombia and Japan. The choice for good varieties that fit to the circumstances for your greenhouse or farm can be rather complicated. We recommend you to contact your account manager.

We are looking forward to meet you at one of our trial locations and give you a warm welcome.
