**ALSTROEMERIA**  
2017-2018

# PROLOGUE

WE ARE PROUD TO PRESENT OUR NEW  
ALSTROEMERIA CATALOGUE 2017/2018.

These days, the ornamental sector has to face major challenges and we would like to respond to these with reliable introductions. Colours have become brighter and flowers larger.

Specifically for you, as a grower, Royal Van Zanten has also improved characteristics such as virus tolerance, stem quality, production, vase life and temperature tolerance.

WE CONTINUE TO INVEST IN IMPROVEMENTS  
AND EXPECT TO BE ABLE TO FURTHER  
DEVELOP ALSTROEMERIA BASED ON A LONG  
TERM VISION.

In the catalogue we introduce nine new varieties. All these new introductions have been extensively tested in the Netherlands, Africa, Colombia and Japan. The choice for the right varieties that are compatible to the conditions on your greenhouse or farm can be rather complicated. We recommend you to contact your account manager.

We are looking forward to meet you at one of our trial locations and give you a warm welcome.

MISTRAL™ | ZALSATRA  
**NEW 2017**

colour:	white
flowers/stem:	5-7
flower size:	normal
stem quality:	high
production:	very high
