

2018 Lily Line up

driven
by
passion

Royal Van Zanten

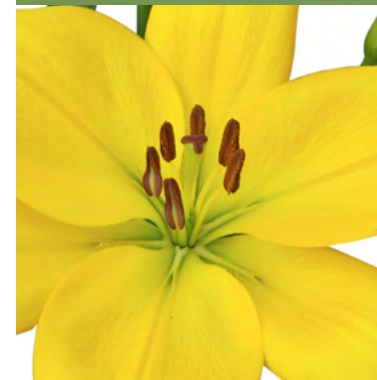

Royal Van Zanten has been a worldwide player for 150 years in breeding, producing and marketing of flowerbulbs. The quality of our bulbs and reliable year-round supply are guaranteed by the production on our own lily nurseries in the Netherlands, France and New Zealand.

Driven by passion our breeders work on the development of new lily varieties meeting market demands. In collaboration with our buyers, we obtain the best results by paying attention to the right properties for bulb growers, flower growers, the wholesale and retail sectors. The right choice of variety is achieved after extensive testing of lily selections at a range of sites both locally and abroad. In this way, we create market value and returns for our buyers.
