NATURE X SELECTION
= STRONG BEAUTY
Up close, the flowers look like they are made of delicate, thin paper, but guess again; the Limonium, or Statice, is a super strong flower! Just look at the places these plants grow in the wild. If you are on the beach, you are likely to spot them. It goes to show why Statice also listens to the name ‘sea lavender’.

Statice copes really well in tough conditions, salty water and sandy soils. So, it’s a tough plant and, thanks to breeding and selection, a star as cut flower.

Her looks are the reason for breeding and selection, but just a pretty face isn’t enough. New varieties have to face up to a long list of demands; think about constant growth, high flower production and a long vase life. To make it from a selected seedling all the way to the top is a real challenge!

In this brochure you will find our 20 commercially grown Statice cut flowers and 6 varieties of Limonium that have proven themselves in each and every way.
