# SUSTAINABILITY THAT BLOOMS

Growing Alstroemeria has little impact on the environment. Not only do you need less heat and light for an optimal cultivation process, but they are also not particularly susceptible to viruses and diseases. So you can keep your use of crop protection products to a minimum. And if you still need to use them, they can be up to 90% biological.

## **We Care, So We Act**

What sets our flowers apart is their ability to thrive under various climatic conditions. In our breeding process too, we concentrate on selecting productive and virus-resistant varieties so to bring the production footprint down even further. Our varieties are rigorously tested around the world, showcasing their excellence, regardless of the climate. It's just one of the many ways in which we improve every day to become more sustainable. Taking responsibility for our future and future generations – we care, so we act. You can read our Corporate Social Responsibility You can read our Corporate Social Responsibility report by scanning the qr code, if you want to find out more.

## **Growing Success Together**

Royal Van Zanten breeds and propagates Alstroemeria with large flowers, attractive colours and strong foliage. In this catalogue you will find a complete overview of our range. But which varieties are right for your location, set-up and vision? We are here to help you make the right choice for you, wherever you may be. Feel free to reach out for more information or any inquiries, or check out our inspiration platform What's Blooming Today® for more ideas!
